About Bentley

Bentley is the global leader dedicated to providing architects, engineers, constructors, and owner-operators with comprehensive software solutions for sustaining infrastructure.

About Bentley

Bentley Subscribers are the ENR Top Design Firms:

- 20 of the Top 20 in:
 - General Building
 - Transportation
 - Power
 - Manufacturing
 - Water
 - Sewer/Waste
- 19 of the Top 20 in:
 - Industrial Process/Petroleum
 - Telecommunications
 - Hazardous Waste
- 47 of the Top 50 Designers in International
- 97 of the Top 100 Pure Design Firms

47 out of 50 U.S. State DOTs use Bentley

Global Business:

- Nearly 3,000 colleagues in 45 countries
- \$500 million in annual revenues

Bentley is:

- #1 in Plant Operations
- #1 in Structural Engineering
- #1 in Water Modeling
- #1 in Roads and Transit Design
- #1 in Bridge Engineering
- #1 in Building Performance

ISO 15926

Introduction

Semantic Web

Federated RDL

What is ISO 15926?

- **ISO 15926: Integration of life-cycle data for process plants, including oil and gas production facilities**
 - Standard for interoperability and the integration of lifecycle information
- **Standardizes:**
 - Dictionary and Taxonomy
 - Information Organization
 - How computer systems connect, exchange and share information
- **Implemented using standards from the World Wide Web Consortium (W3C)**

Who develops ISO 15926?

- FIATECH Members – including owners(15), contractors(12), equipment suppliers, and software providers (19) are working together with the POSC Caesar Association and DNV, to create ISO 15926 online reference data library.
- FIATECH is an industry consortium that provides global leadership in identifying and accelerating the development, demonstration, and deployment of fully integrated and automated technologies to deliver the highest business value throughout the lifecycle of all types of capital projects. www.fiatech.org.
- POSC Caesar is a global, nonprofit organization that promotes the development of open specifications to be used as standards for enabling the interoperability of data, software, and related matters. www.posccaesar.com

Ontologies & Inference Engines

“For the semantic web to function, computers must have access to structured collections of information and sets of inference rules that they can use to conduct automated reasoning.”

Berners-Lee, T, Hendler, J & Lassila, O ‘The semantic web’, *Scientific American*, May 2001

Semantic Web

What humans are good at

- Understanding
- “Why”
- Tacit knowledge
- Stories
- Following hunches
- Checking external refs

What machines are good at

- Executing
- Facts and figures
- Explicit knowledge
- Keeping track and logs
- Analyzing big style
- Calling web services

What Wikipedia knows

- Wikipedia has articles about...
 - ... all cities
 - ... their populations

But it turns out unless someone answers the question you cannot find out any related information ...

It turns out WIKIPEDIA cannot even answer the question of what are the 10 largest cities in Asia ...

Computers cannot make connections

Computers need our help

The European Commission's View

“We believe, as many others do, that today’s Web gives us just an inkling of the full potential globally distributed systems may achieve in terms of information access and use. This note is an invitation to the relevant European R&D communities to participate jointly in realizing this potential.”

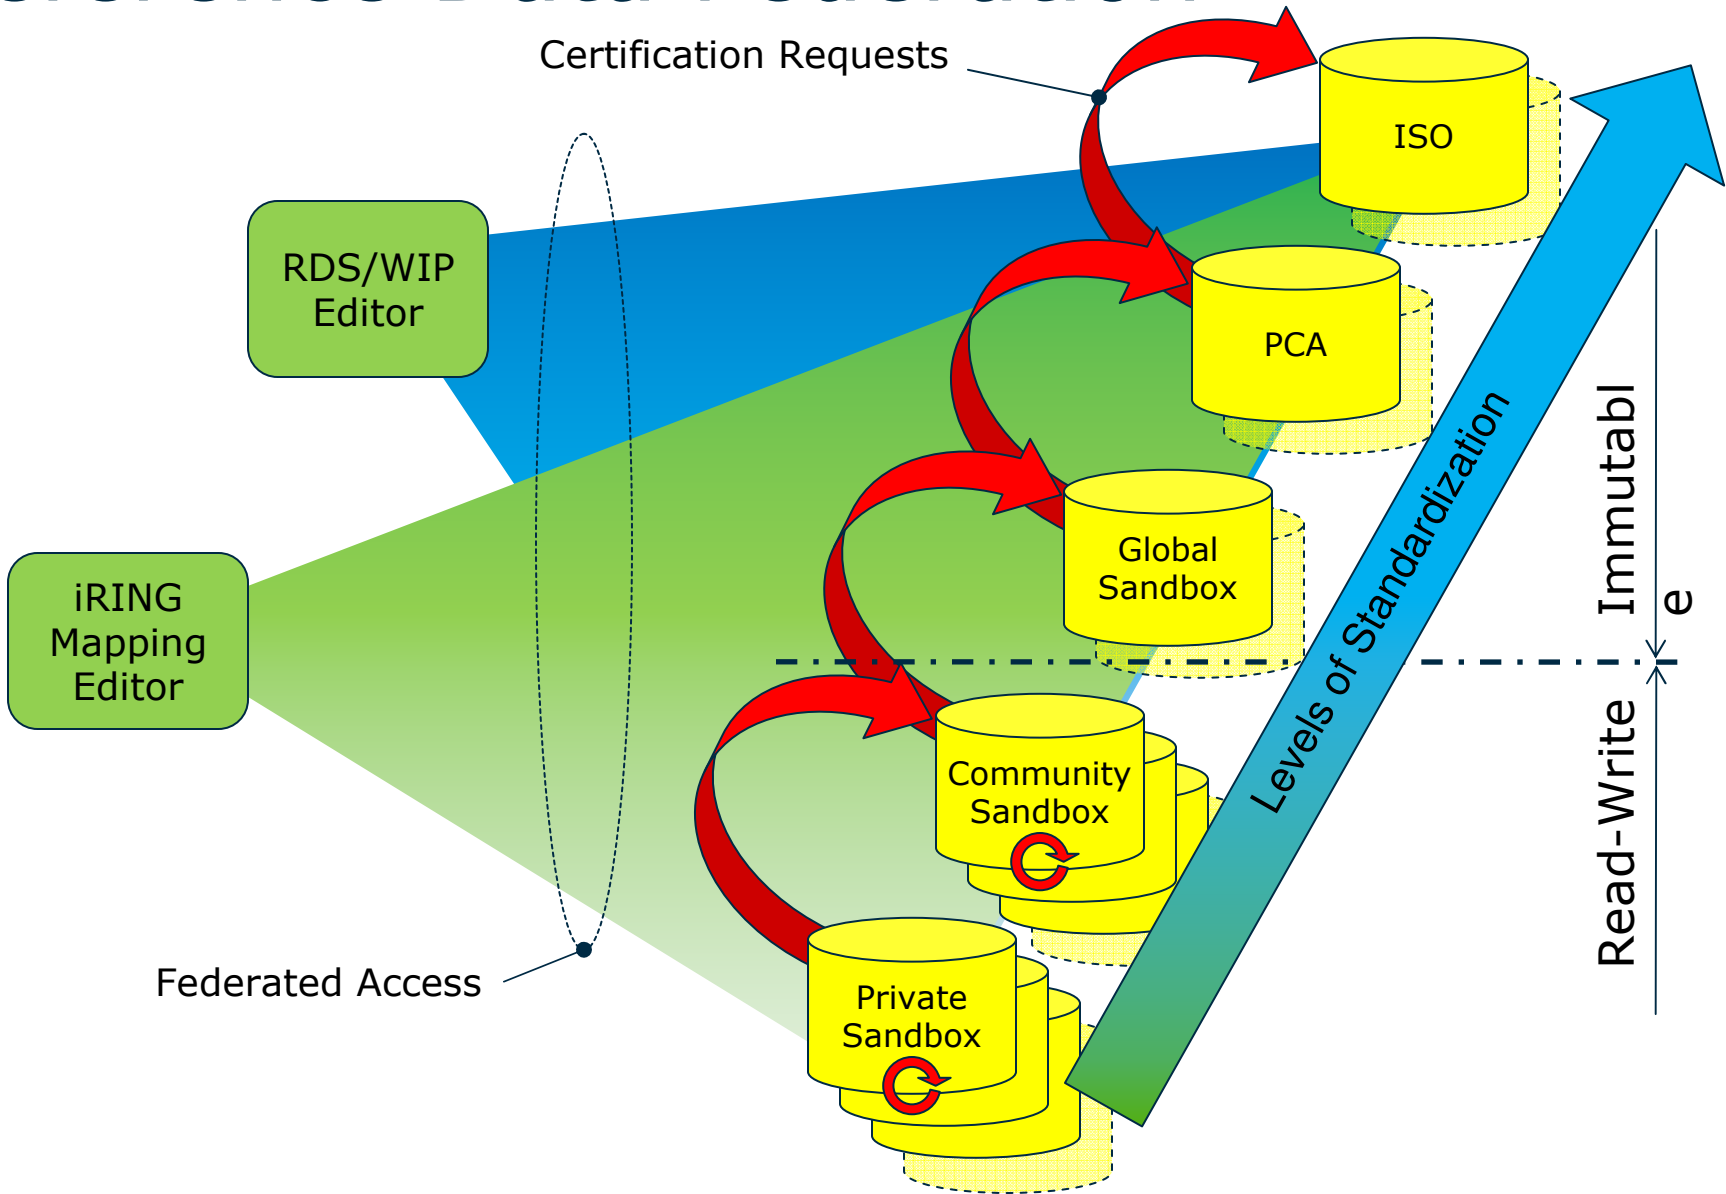

Stork, Hans-Georg and Mastroddi, Franco, *Semantic Web Technologies - a New Action Line in the European Commission’s IST Programme*, 2001

Metadata

“given the sheer size and dynamics of the contents involved, it is a case in point for automating to the largest extent possible the production of metadata ...”

Stork, Hans-Georg and Mastroddi, Franco, *Semantic Web Technologies - a New Action Line in the European Commission's IST Programme*, 2001

Reference Data Federation

ISO 15926

The semantic answer for engineering and interoperability

iRING – A set of information interoperability and integration protocols and reference data that are compliant with the ISO 15926, Parts 7, 8, & 9 standards, which builds and depends on ISO 15926 Parts 1 - 6.

The FTP of ISO 15926

<http://iringug.org>

iRINGUserGroup - An open online community of users, companies, and organizations who use, are considering using, or are developing or deploying *iRING* protocols. The *iRINGUserGroup* is also responsible for the management, enhancement, and maintenance of *iRINGTools* and *iRINGSandbox*.

<http://iringtools.org>

iRINGTools - A set of free, public domain, open source (BSD 3 license) software applications and utilities that implement *iRING* protocols. *iRINGTools* provide users with production ready deployable solutions. *iRINGTools* also provides technology solution providers with usage patterns for the implementation of *iRING* protocols in their respective solutions.

The Filezilla of ISO 15926

<http://iringsandbox.org>

*iRING*Sandbox – An internet hosted, publicly accessible and publicly downloadable, *iRING* reference system that will showcase the use of *iRING*Tools and other technology solution provider's products that implement *iRING* protocols. This reference system will also include an example *iRING* community sandbox that will hold ISO 15926 RDL extensions.

The FTP site of ISO 15926

ISO 15926

An Engineering Workflow

[Return to Top Menu](#)

ISO 15926

- That handover data format ?

ISO 15926 Benefits

- Interoperability
 - NIST Study shows poor integration wastes 30% of costs
- Ageing Skilled Workforce
 - US Dept of Labour state 50% of engineering workers will retire in the next 5-10 years
- Knowledge Capture
 - No system for knowledge capture (we have the design ... but not the reason)
- Semantic Capture
 - Current designs do not capture the meaning
- Standardise Content (as well as the format)
 - Is water the same as H₂O

How do I use it

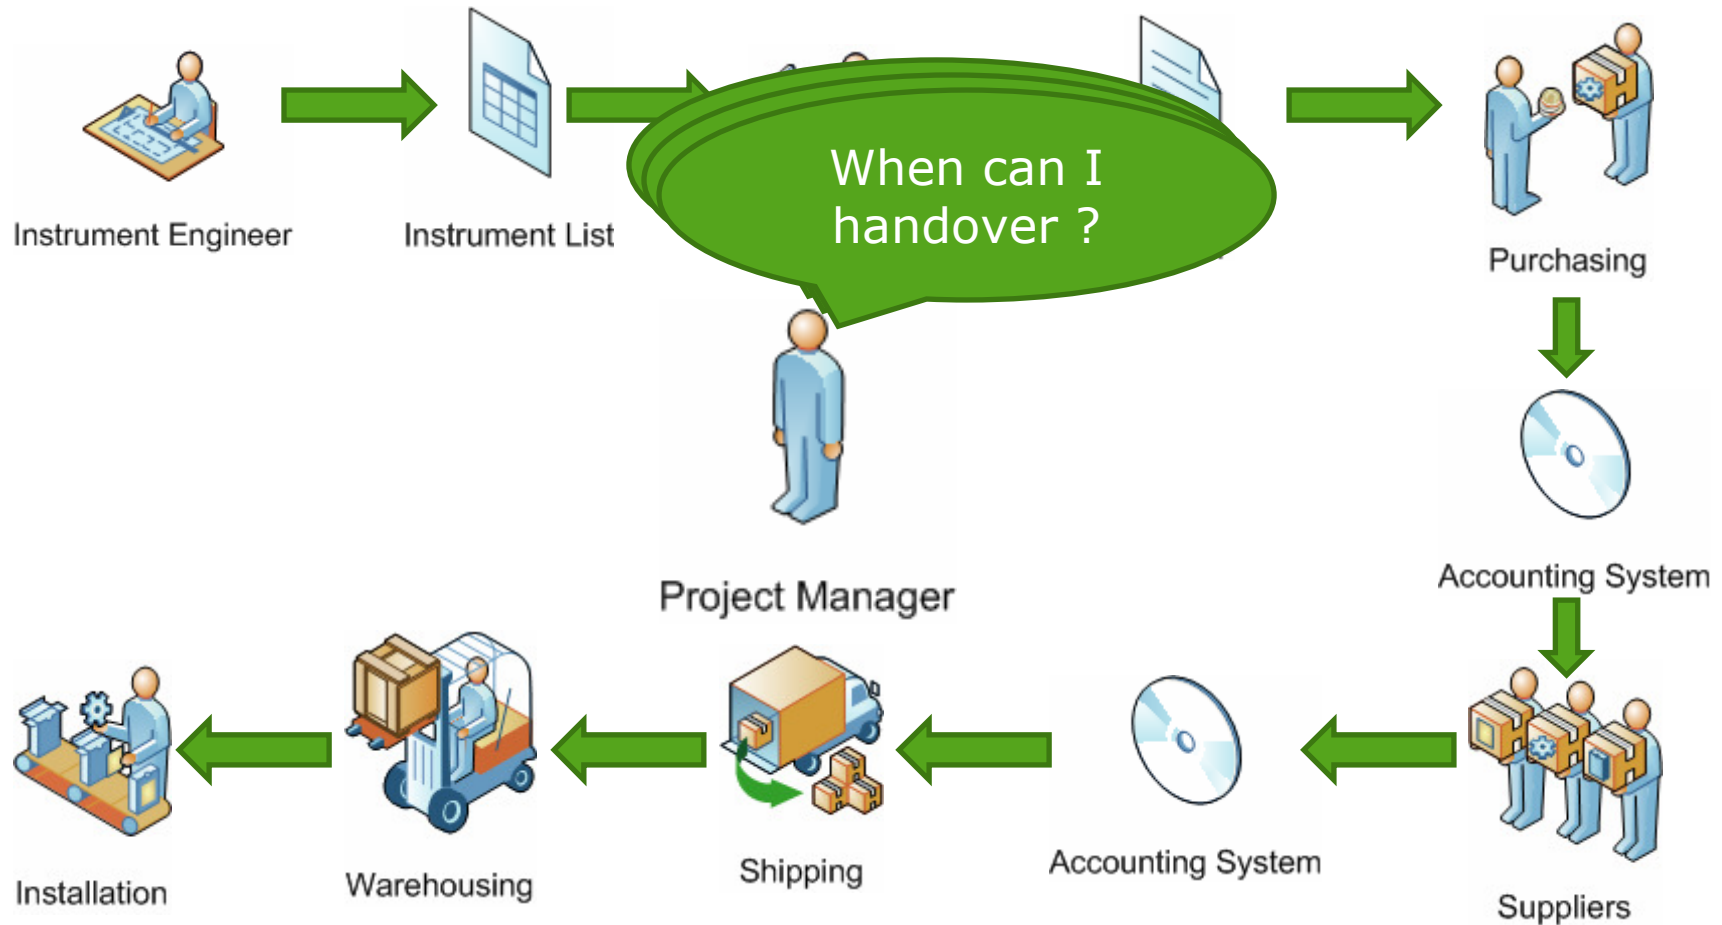

- Simple Scenario
 - A hookup
 - Where Mechanical meets I&W
 - Interoperability right

Hookup definition

A configuration of mechanical parts or devices providing a link between a process source and an instrument or instruments.

Hookups - Dataflow

Hookup ...

- Hookup ...
- Unambiguous ...
- Clear Information

Hookups ...

- Answer : Yes all of my descriptions are consistent ...
- Q2 : Can all consumers of data use the information ...

Hookups

- In this instance we would not only need to know how to read DWG ... Which is common format ... but also know that all of this text has some content ..., extracting this brings little benefit to down stream users ... too much ambiguity ... and all context is lost with extraction ...

ISO 15926 can resolve this

Hookups ...

- Answer ... Yes I have it in a format which is readable by my suppliers ...

Hookups

- Q3 : Can your suppliers provide the required information back in a format you can use ...

Hookups

- Answer : Yes my supplier and I have a great relationship and he always provides the best price for all materials ... and knows exactly when a superior / cheaper item can replace an inferior / longer lead time item

ISO 15926 can resolve this

Hookups

- Q4 : Can your installers / stock controllers create an installation package ?
- Answer : of course ...
- Is this automated ? Is it linked to RFID ? Is there real time management of item availability ... ?

Interoperability

- More than handover ...
 - Projects have more communication channels than a single handover to O/O ...

ISO 15926 Benefits

- Interoperability
- Ageing Workforce
- Knowledge Capture
- Semantic Capture
- Standardise Data (as well as format)

ISO 15926

An Engineering Implementation

[Return to Top Menu](#)

What are Bentley doing to facilitate ISO 15926?

- Common Class Editor
 - Common way to define, manage and maintain the ISO 15926 data model
- Data transfer mechanisms
 - Exchange information between applications using common “language”
- Common tools and utilities
 - Common catalog definitions
 - Common Isometric management tools
 - Common interfaces to analysis
- Collaboration, collate and viewing technology
 - Bring all the drawings, models and data together for review, comment, mark-up etc

Bentley's commitment to Open Standard: 2008 FIATECH CETI Award winner

FIATECH The 2008 Award:

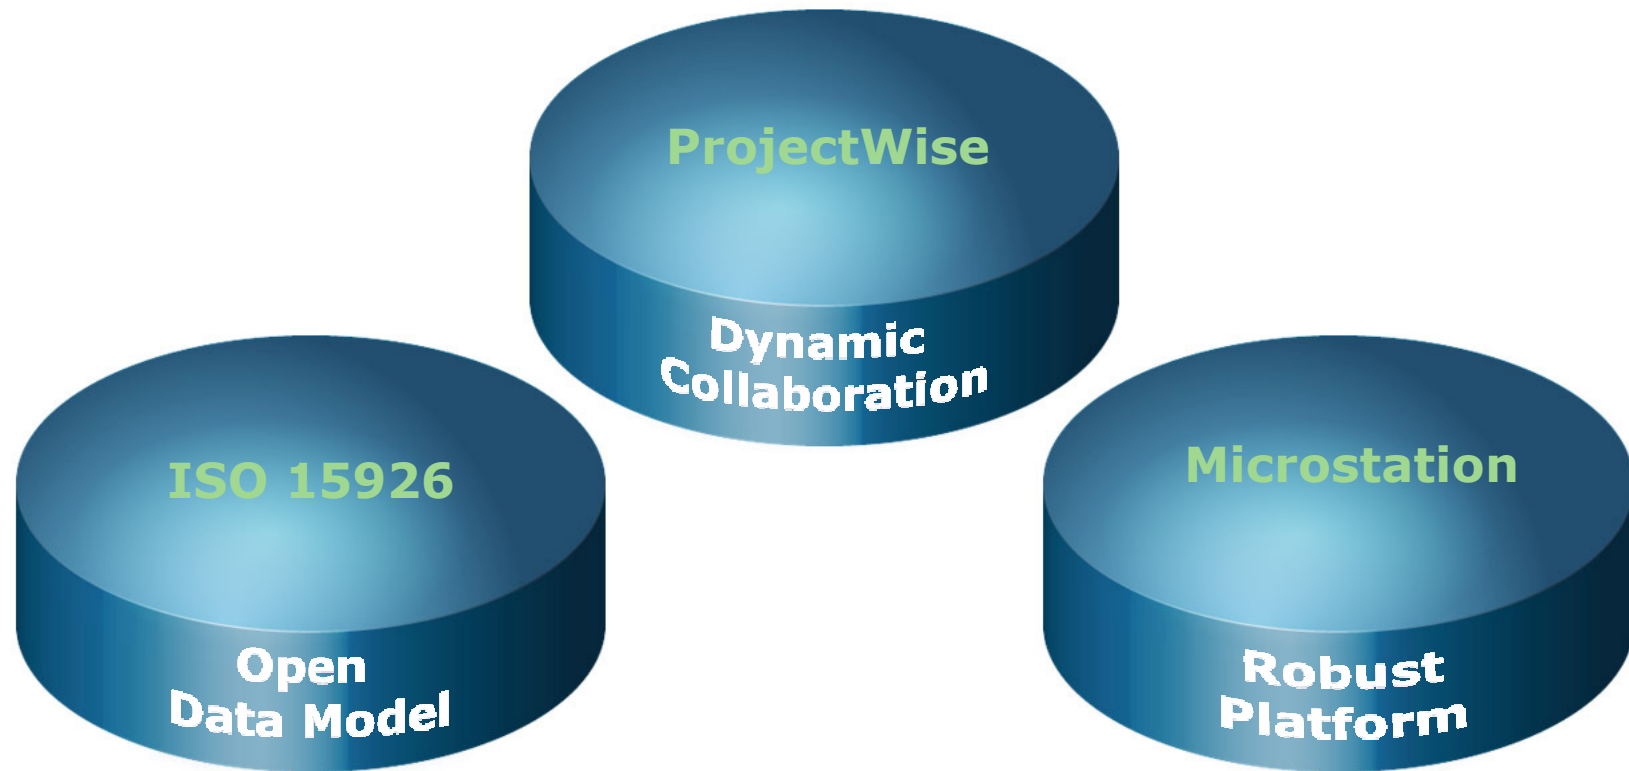

Bentley is honored for its collaboration on FIATECH's “**Accelerating the Deployment of the ISO 15926**” (ADI) project, and recognizes Bentley's extensive work this past year on the ISO 15926 international standard for process plant information...

Bentley's participation in ISO 15926

- Active member of FIATECH and POSC
- Co-founder of FIATECH ADI Project
- Steering Committee member of
- Active participation in the *if* and Avalon projects
 - Bentley is driving the *cr* protocols from the Technology Provider Perspective
- Collaborating with participants on ISO 15926 implementation
- Actively *cr* 15926 and providing feedback to improve

Bentley's OpenPlant products use ISO 15926 natively!

OpenPlant

“The new plant offerings from Bentley are the first commercially available products to share and meet the primary goal of the iRING user community (www.iringug.org) – that is, to enable real-time, seamless sharing and interoperability of data and information across different organizations and systems using an internationally recognized standard.”

Early Adopter Comments ...

“With OpenPlant products, all the tools use the same platform, leverage the same dynamic views and data sources, and provide a single hub of information, helping to improve efficiencies”

Our Vision...

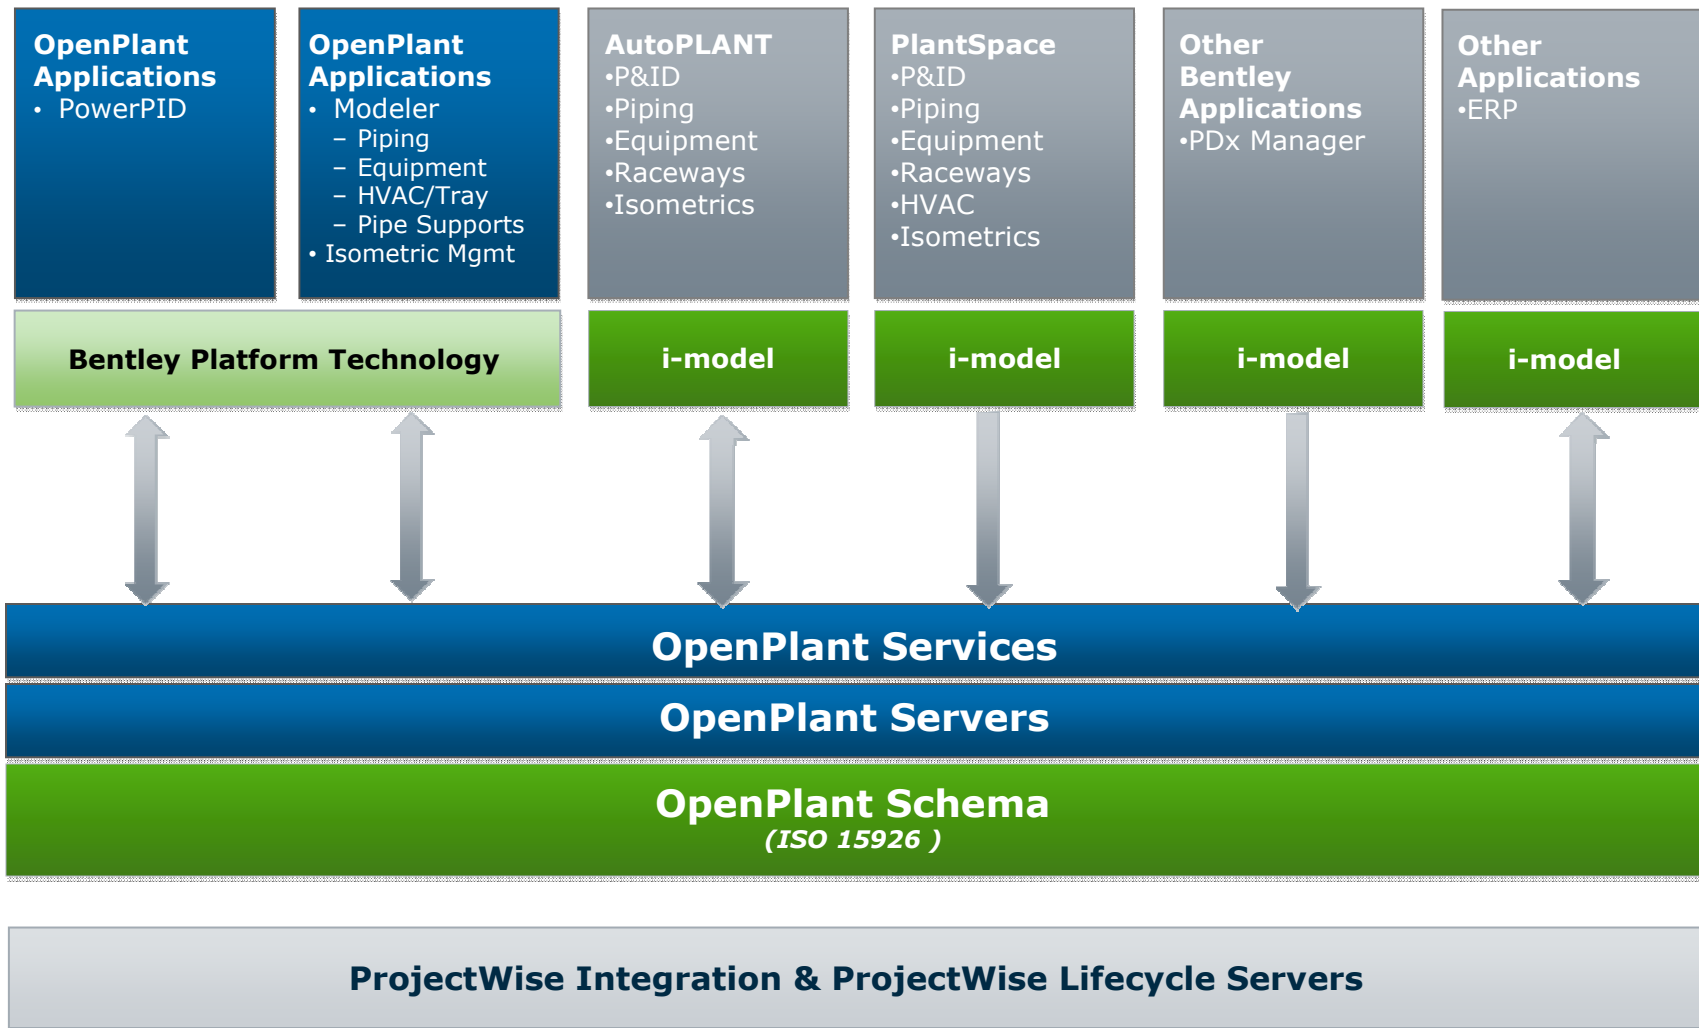

The Benefits ...

- Data interoperability using Industry Standards
 - Open & Common Information Model
 - Bentley OpenPlant™ products designed for the distributed world;
 - Uses ISO 15926 reference data natively
 - Quick access & sharing of data, facilitating collaboration
 - Provides complete, consistent & correct data throughout the plant lifecycle
 - Provides an integrated, functionally complete set of solutions supporting key engineering disciplines
- Achieves standardization across key plant lifecycle workflows
 - Reduces the time to implement & learn
 - Increases end-user productivity
 - Improves plant safety & performance
 - Delivers greater return on investment in information
 - ISO 15926-based Open Information Model offers true data & application interoperability lowering overall cost of ownership

Low occurrences of a particular value may suggest erroneous data

Bentley and iRING Demonstration

Are you ready for ISO 15926 ?

- Are your systems semantically
- You have a work force with (or are in the process of attaining) the necessary knowledge)
- You have a connected
- You and your suppliers have a semantically searchable Knowledge
- You have a marketplace where you can swap and buy from a single supplier

**If you can say YES to all -
You are already using ISO 15926 !**

How can you prepare for ISO 15926

- Join POSC Ceasar
 - www.posccaesar.org
- Sponsor JORD Project
 - Joint Operational Reference Data
- Implement iRing technologies
- Invest in ISO 15926 as a core technology
- Implement Work Process which recognise the important of data

Thank You!!

Glen Worrall
glen.worrall@bentley.com
