

- DIGITALIZATION OF THE OIL AND GAS INDUSTRY -

SEMANTIC DAYS

20TH-21ST MAY 2014

Conference for major new improvement in integrated work processes and knowledge management.

Digitalization of the oil and gas industry

Radisson Blue Atlantic Hotel, Stavanger, Norway. May 20-21, 2014

In line with the Norwegian Government initiative on digitalization of the industry, Semantic Days 2014 focus this year on presenting new technologies and improved work processes in development projects and integrated operations.

A USA based global contractor will present major improved work processes due to standardizing the information in the projects and in the corporate organization by deploying ISO 15926.

Major oil companies on the Norwegian Continental Shelf (NCS) will present new integrated work processes in asset planning and logistics that have the potential of reducing the cost on the NCS with some NOK 10-15 billion per year with today's activity!

We are looking forward to an inspiring conference with challenging discussions in Stavanger, 20th - 21th May 2014, and hope to see you there.

Take the opportunity to bring your colleagues to this venue. If you consider co-locating a project meeting with the conference please let us know.

More information will follow.

Best regards,

Thore Langeland
The Chairman of the Program Committee
